Feeding Directions

Seminole Grass Balancer 16:8 Horse Mineral Block is a convenient way to provide your horses with a balanced mineral and vitamin source to complement a grass type roughage (pasture and/or hay) program. Put Seminole Grass Balancer 16:8 Horse Mineral Block in the stall or out on pasture. Provide one block per four horses when horses are pastured together. Locate blocks near water troughs and protect from heavy rain by putting in a covered feeder. Provide for horses year round.

Intake should be 0.25 to 0.75 pounds per hundred pounds of body weight per month. Intake will vary due to forage condition, season, environmental conditions, activity of the horse and availability of other sources of required minerals. If intake exceeds 4 oz./head/day, offer free choice loose salt in addition to this block.

Seminole Feed® Quality Guarantee

If you're not satisfied, we're not satisfied. Should the quality of this product not meet your expectations, return it within 30 days with proof of purchase for a complete refund or replacement.
