FEEDING DIRECTIONS

Nursing Foals: Feed 1 pound of Foal Balancer Milk Pellets per 100 pounds of body weight daily starting at one week of age and continue until weaning.

Orphan or Early Weaned Foals: Feed 2 pounds of Foal Balancer Milk Pellets per 100 pounds of body weight daily and continue until weaning. Start weaning foals at 3 - 4 months.

Weanlings: For 3 weeks after weaning, feed 2 pounds of Foal Balancer Milk Pellets daily, along with a recommended horse feed at 1 pound per 100 pounds body weight daily. Provide high quality roughage on a free choice basis. After 3 weeks, reduce the amount of Foal Balancer Milk Pellets to 1 pound daily and gradually increase the amount of complete horse feed to 1.5 pounds per 100 pounds of body weight daily over a 1 - 2 week period, gradually reducing the amount of Foal Balancer Milk Pellets.

Lactating Mares: From 30 days before foaling until foals are 3 to 4 months of age, feed 1 pound of Foal Balancer Milk Pellets daily as a supplement to the daily ration.

Long Yearlings to Two Year Old Horses/Performance or Intense Race Training: Feed 2 pounds of Foal Balancer Milk Pellets daily as a supplement to the daily ration.

Two Year Old to Mature Horses/Performance or Intense Race Training: Feed 1 pound of Foal Balancer Milk Pellets daily as a supplement to the daily ration.

SEMINOLE QUALITY GUARANTEE

If you're not satisfied, we're not satisfied. Should the quality of this product not meet your expectations, return it within 30 days with proof of purchase for a complete refund or replacement.

NOTICE

Seminole Foal Balancer Milk Pellets are perishable. Store this product in a dry, well-ventilated area protected from animals and insects. Do not feed moldy, infested or contaminated feed to animals as it may cause illness or death. This feed is for consumption by horses only. No liability will be accepted for direct, incidental or consequential damages from any use inconsistent with the feeding directions, including but not limited to use for other species. Always feed by weight and not volume. When feeding by volume, periodically weigh the feed to verify that your horse is receiving the proper amount. Provide clean fresh water at all times.
